### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The specific limitations of the method steps of creating a spirally wound metal strip to form an elliptically shaped pipe through the claimed steps and then forming the elliptically shaped pipe into a circular pipe are not anticipated or made obvious over the prior art of record in the examiners opinion. For example, Ellzey '435 teaches an apparatus and method for forming a variety of shaped spiral pipes (see rejection of 4/19/2006) however such pipes are envisioned to be possibly used as an airplane wing or such and therefore are intended to hold their elliptical shape. Mattsson '182 discloses an apparatus and method for turning circular spiral pipes into elliptically shaped pipes to be used as duct work, while Beyer et al '253 discloses an apparatus and method for correction of large diameter cast iron piping intended to be circular but being having a small degree of ovalness due to annealing and cooling. However, there is no motivation to combine any of the above references since changing the shape of the Ellzey pipe would destroy the intended purpose of the pipe. Conversely applicants invention deals with the production of large diameter spiral piping which due to it's large diameter is produced with an elliptical shape and then formed into a circular shape.

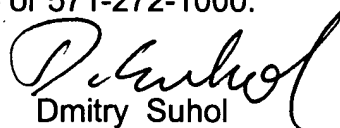

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
